Find your perfect fit: nail size guide

How to measure

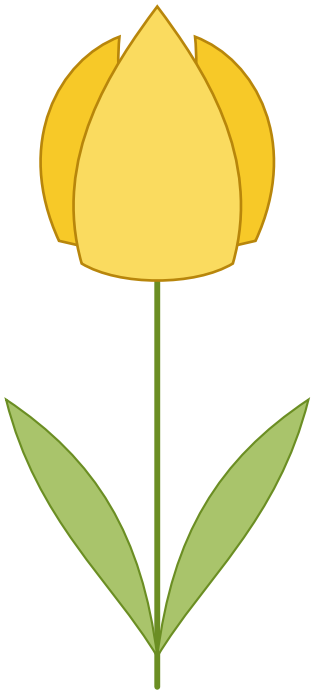

1. Print this page at 100% scale and check the 50 mm line below.
2. Hold each fingernail against the bars, or use the cut-out ruler on page 2, and find the size that matches the **widest part** of your nail.
3. Write each size in the tracker on page 2 (thumb through pinky, both hands).

Print check: this line must measure exactly 50 mm (about 2 inches).
If it doesn't, reprint at 100% / "Actual size" (not "Fit to page").

Size chart (actual size)

Hold your nail against each bar. The widest part of your nail should match the bar. Bars are actual size.

Size 0	18 mm
Size 1	17 mm
Size 2	16 mm
Size 3	15 mm
Size 4	14 mm
Size 5	13 mm
Size 6	12 mm
Size 7	11 mm
Size 8	10 mm
Size 9	8 mm

Pinky		

Fit tips

- Your two hands can be different sizes. Measure every nail.
- Between two sizes? Choose the larger and gently file the sides to fit, or message us and we'll help.
- The tip should cover your nail from side wall to side wall without sitting on your skin.
- Measure with nails clean and bare, and check your sizes before every order.

Cut-out measuring strips

Cut along the dashed lines. Hold a strip across the widest part of your nail and read the mm, then match it to the size chart.
